

Deriv Investments (Europe) Limited

Key Information Document

Multipliers

1. Purpose of the document

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains, and potential losses of this product and to help you compare it with other products.

2. Product

Product name: Multipliers

Product manufacturer: Deriv Investments (Europe) Limited (“DIEL”), licensed and regulated by the Malta Financial Services Authority. To get in touch with us, visit our [contact page](#). This document was last updated on 25 January 2021.

You are about to purchase a product that is not simple and may be difficult to understand

3. What is this product?

Type: Multipliers

Multipliers combine trading features of options and contracts for difference, allowing you to obtain an indirect exposure to an underlying asset. A Multiplier is a contract where the return is determined by the percentage in price movement multiplied by your stake and increased by the multiplier chosen. For more information on contract specification and forex pairs offered on Multipliers visit [our website](#).

Objectives

When trading on Multipliers, the objective is to speculate on the price movement of an underlying asset. For instance, if you think the price will go up you purchase an “Up” contract, conversely if you anticipate that the price will go down, you purchase a “Down” contract. The difference between the open and close price of the contract is the price movement. You will earn a profit when the price moves in favour of your contract. For example, for a Multiplier Up contract, you earn a profit by closing your trade when the price moves higher than the price at which you purchased your contract.

Your return is based on this price movement multiplied by your stake and ultimately amplified by the amount of the multiplier. The multiplier amount increases your market exposure, potentially increasing your profit, however, Multipliers differ from other forms of trading on leverage as your loss will never exceed your initial stake.

The resulting value will equate to your profit or loss depending on your speculation of the asset’s price movement (minus any costs, as detailed below in the ‘What are the costs?’ section).

Intended retail investor

Multipliers are intended for investors who have knowledge of, and experience trading complex financial instruments such as options. Likely investors will comprehend key concepts of trading on forex instruments and they will also have the ability to bear the loss of their entire investment.

Term

Multipliers have no recommended holding period, you may close your open positions based on market movement and your individual trading strategy and objectives.

What are the risks, and what could I get in return?

Summary Risk Indicator ('SRI')

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 7 out of 7 which is the highest risk class. This rates the potential losses of future performance at a very high level, and poor market conditions are very likely to impact our capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

There is no minimum or recommended holding period for this product. Price movement may affect your return and you may lose up to your initial investment.

There is no capital protection against market risk, credit risk, or liquidity risk. Market conditions may affect your trade and it could close at an unfavourable price, which may significantly impact how much you get back. This product does not include any protection from future market performance. If we are not able to pay you what is owed, you could also lose your entire investment. However, you may benefit from a consumer protection scheme (see the section **'What happens if we are unable to pay out?'**).

Performance scenarios

The following scenarios illustrate how your investment could perform. You can compare them with the scenarios of other products. The table below takes the forex pair EURUSD with the following tabulated trade parameters into consideration.

Multiplier (held Intraday)							
Opening price:	1.13000	Multiplier (\$):	30				
Stake (\$):	100	Notional value of the trade (\$):	3,000				
Up Multiplier				Down Multiplier			
Performance scenario	Closing price	Price change	Profit/Loss	Performance scenario	Closing price	Price change	Profit/Loss
Favourable	1.13170	0.15%	\$4.50	Favourable	1.12831	-0.15%	\$4.50
Moderate	1.13057	0.05%	\$1.50	Moderate	1.12944	-0.5%	\$1.50
Unfavourable	1.12831	-0.15%	-\$4.50	Unfavourable	1.13170	0.15%	-\$4.50
Stress	1.12453	-0.50%	-\$15.00	Stress	1.13565	0.50%	-\$15.00
Extreme	1.11870	-1.00%	-\$30.00	Extreme	1.14130	1.00%	-\$30.00

The performance scenarios displayed represent what you could get depending on the price movement, stake and multiplier. In the most extreme scenario, when the price moves against your prediction, you will not lose more than your initial investment which is the stake.

The scenarios presented are only indicative; your return will vary depending on how the market performs and how long you hold the contract. These figures do not take into account your personal tax situation, which may also affect your return. These performance scenarios assume you only have one position open and do not take into account any other positions. If you have multiple positions with us, your risk may be cumulative and not limited to one position.

The stress scenarios above show what you might get back in extreme market circumstances, and it does not take into account a situation where we are not able to pay you.

What happens if Deriv Investments (Europe) Limited is unable to pay out?

DIEL participates in the Investor Compensation Scheme which covers 90% of our net liability to a client in respect of investments which qualify for compensation under the Investment Services Act subject to a maximum payment of €20,000 to any one person. Learn more about the Investor Compensation Scheme by reading the section entitled 'Protection of your funds' of our [terms of service](#).

What are the costs?

The table below shows the cost involved when you purchase a multiplier contract on a forex pair.

Composition of costs			
One-off costs	Entry/Exit cost	Commission	<p>A percentage of the notional value (stake*multiplier) is included in the purchase price of the contract for all underlying instruments. Commission applied can be up to 0.1% of the notional value, this is displayed prior to purchasing your contract. For example:</p> <p>If you purchase a Multiplier UP contract on EURUSD with a stake of \$100 and a multiplier of 30, the notional value of the contract is \$3,000. The commission is 0.0141% of the notional value. Therefore, the cost of commission is \$0.42</p>

How long should I hold it, and can I take money out early?

Multipliers are intended for short term trading and are generally not suitable for long term investments. There is no recommended holding period and no cancellation fees. You can open and close a multiplier contract at any time during market hours.

How can I complain?

Complaints may be submitted to complaints@deriv.com. For more information about our complaints and disputes process, kindly refer to our complaints policy section within our [terms of service](#).
